

# SHADOWHQ

VIRTUAL BUNKER

## Cyber Security Attack Response

ShadowHQ offers a safe place for your response team to gather and respond to cyber security attacks, natural disasters, and critical events when your IT systems and accounts are compromised or offline.

## How does ShadowHQ work?

1

### YOU'VE BEEN HACKED

Your cybersecurity systems alert you to a potential breach that is likely to compromise your employees and the core systems you rely on. You bring your existing systems down as you prepare to respond.

2

### ACTIVATE SHADOWHQ

Your crisis management teams activate ShadowHQ, instantly gaining access to a secure communications channel, business continuity & cyber response plans, war rooms, and real-time updates.

3

### CONTAIN THE THREAT

Your crisis management teams start containing the threat by executing your mitigation strategy through a virtual bunker that's secure and isolated from your core systems. Teams can engage in voice, video, and group chats, share updates, and prioritize tasks.

4

### RETURN TO NORMAL OPERATIONS

Once the threat is contained and critical systems are secure and under your control, ShadowHQ is deactivated. ShadowHQ will remain out of sight, ensuring your company has an on-demand critical event response solution should another breach occur.

# ShadowHQ Features

Stay in control during critical events with purpose-built functionality, from the initial response to normalized operations.

## VIRTUAL WAR ROOMS

Create dedicated meeting rooms for key personnel to discuss response strategy, share updates, and more.

## SECURE MESSAGING

Communicate with confidence using out of band secure messaging backed by powerful encryption.

## SECURE FILE STORAGE

Safely share documents, files, and information with your teams as you work to contain an ongoing breach.

## REAL-TIME UPDATES

Ensure your teams are on the same page as events unfold with a dedicated dashboard for real-time updates.

## THIRD-PARTY COLLABORATORS

Create dedicated meeting rooms for key personnel to discuss response strategy, share updates, and more.

## FIRE DRILLS

Take part in hands-on fire drills and ensure your teams are up to speed on how to respond during a crisis.
